Level 1	Level 1	Level 1	Level 1

Cal OES COASTAL REGION

Vessel Loss of Propulsion, Crescent City, Del Norte County, SPILL: 16-7233

On 12/01/16 at 1541 hours the California State Warning Center (CSWC) received a report from the US Coast Guard (USCG) Sector San Francisco advising that a 36 foot vessel, "Star Lady" encountered a loss of propulsion 4 nautical miles southwest of the Crescent City Buoy off coast Del Norte County.

- Per the USCG, they will tow the vessel, with USCG Chetco River, to port in Crescent City.
- There has been no release of hazardous materials.
- The Cal OES Ports and Harbors Emergency Services Coordinator (ESC) will monitor the situation until the vessel is in safe harbor.
- The CSWC made all appropriate notifications per SOP.

Cal OES INLAND REGION

- Nothing significant to report.

Cal OES SOUTHERN REGION

Upright Derailment, Bloomington, San Bernardino County, SPILL: 16-7230

On 12/01/16 at 1512 hours the California State Warning Center (CSWC) received a report from Union Pacific Railroad advising that due to unknown reasons a single rail car derailed upright in the rail yard in Bloomington, San Bernardino County.

- The rail car has been re-railed.
- The rail car last contained liquefied petroleum gas.
- There was no reported injuries and no release of hazardous materials.
- The CSWC made all notifications per SOP.

SITUATION SUMMARY

California Department of Public Health Zika Virus Disease Update

- The Medical and Health Coordination Center (MHCC) has been activated in response to the Zika Virus Disease and the Southern California Meningococcal Disease Outbreak 2016.
- This Situation Report contains only information about the Meningococcal Disease Outbreak. The California Department of Public Health (CDPH) and Emergency Medical Services Authority (EMSA) are currently the only Emergency Function 08 (EF 08) partners at the state level reporting on these activations. No new cases are currently under investigation.
- The MHCC will deactivate at 1700 hours on Thursday, 12/01/16 for its response to the Meningococcal C Outbreak 2016 incident.
- CDPH programs will continue to monitor the outbreak.
- This will be the final EF 8 Situation Report for this incident unless conditions warrant a change. (The MHCC remains activated in response to Zika Virus Disease)

Meningococcal Disease

- Since March 2016, 27 cases of meningococcal disease, including two fatal cases, have occurred among residents or visitors to Los Angeles County, Orange County, Ventura County and the City of Long Beach.
- No new cases are currently under investigation.
- Please see attached for full report.

WEATHER OF CONCERN

Weather of Concern

- Southern California: A strong and damaging Santa Ana wind event is expected to occur across Southern California Friday into Saturday, with the strongest winds likely to occur Friday into Friday night. Winds are expected to be the highest in portions of Los Angeles, Orange, Riverside, San Bernardino, San Diego, and Ventura Counties. With humidities expected to lower through the day on Friday, Red Flag Warnings and Fire Weather Watches have been issued for several counties. The threat of strong Santa Ana winds with low relative humidities and the associated threat of downed power lines will bring extreme fire danger to the region.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

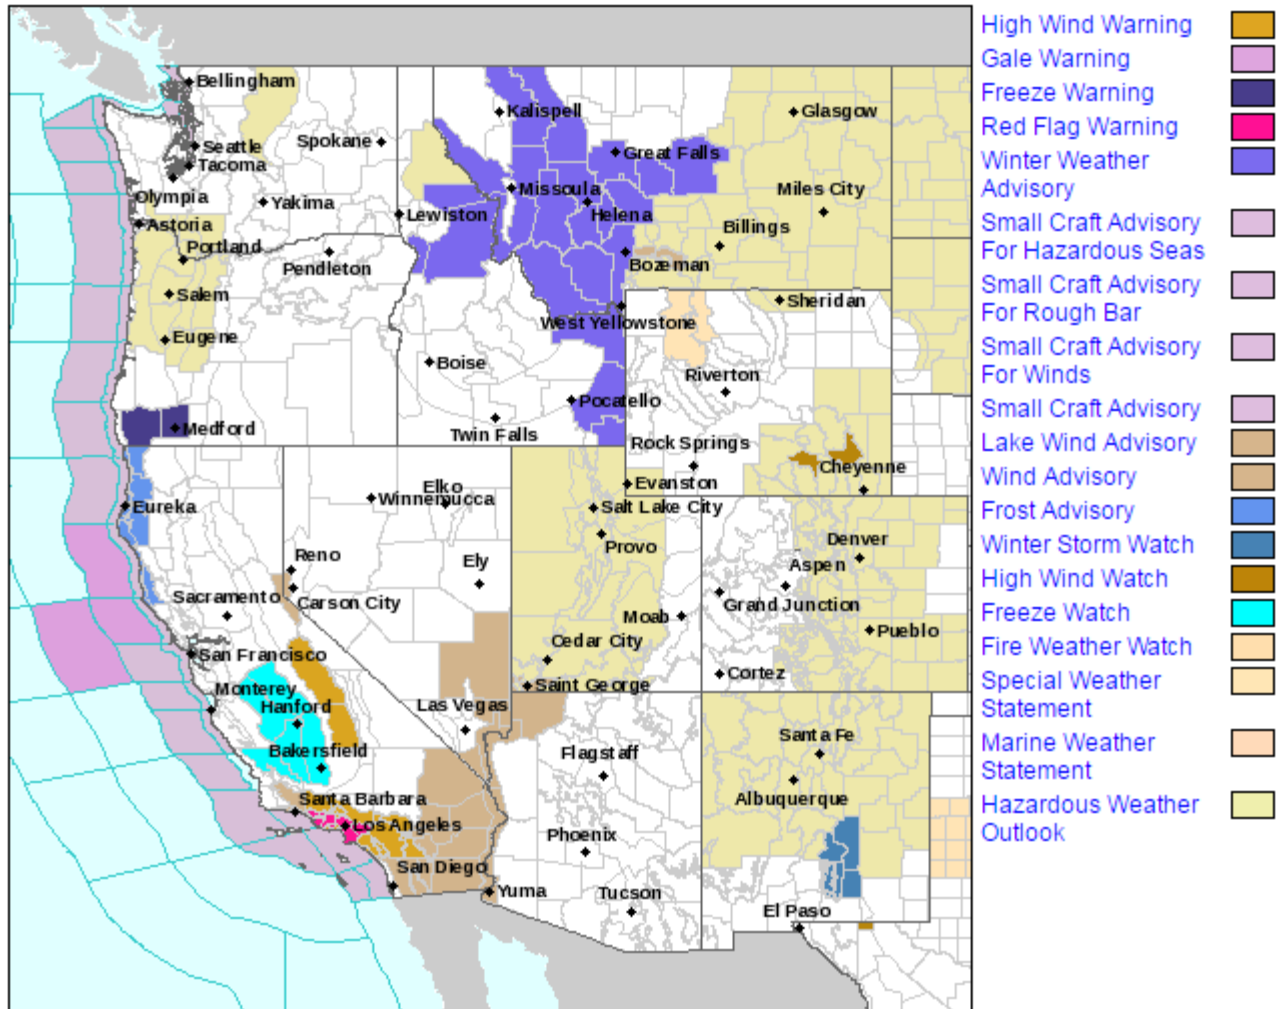

A dry northwesterly to northerly flow aloft will be over Northern California through Saturday. Although there will be some mid and high clouds at times, precipitation is not expected. High pressure will be the dominant feature, and some sheltered low spots will see strong inversions form, and low stratus and fog may develop. Wind-prone areas from the western Sierra slopes to the coastal range will see north to northeast surface winds gust to 20-30 mph, mainly in the mornings. By late Saturday the next Pacific storm system will approach the North Coast. Clouds and south to southwest winds will increase late in the day and overnight. Light rain will reach far northwestern California Sunday morning, and spread across the far northern end of the region during the day. Snow levels will be 4000-5000 feet. Most areas will just see more wind and clouds on Sunday, however. A second system will spread more light rain and snow across the northern half of Northern California Monday evening. Snow levels will be 2000-4000 feet. Stronger and wetter systems are expected toward the mid to latter parts of next week.

SOUTHERN CALIFORNIA

A trough dropping south from Canada will bring below normal temperatures to the area through Friday. Maximum temperatures will be in the upper 30s and 40s across the mountains and mid 50s to mid 60s in the valleys today, with 30s to low 40s across the mountains and 50s to low 60s in the valleys Friday. Minimum humidity will be above 30% away from the deserts today and then drop to 15% to 30% Friday. Temperatures will warm around 10 degrees Saturday and another few degrees Sunday as a ridge of high pressure builds into California from the Pacific. Minimum humidity will drop into the single digits and teens away from the San Joaquin Valley and its surrounding foothills this weekend. North to northeast winds of 20 to 40 mph with gusts to 60 mph will surface across much of Southern California Friday morning through Saturday evening. A Pacific trough will drop down the West Coast bringing well below normal temperatures and a chance of showers with light rainfall totals to the region early next week. This trough will also bring strong westerly winds to the mountain ridges and desert passes early next week.
